

AIRMAN Brand Diesel Engine Generator (Japan)

AIRMAN Diesel Engine Generators from Japan are widely trusted in Bangladesh for their high performance, fuel efficiency, and long-lasting durability. These generators are specially designed to provide stable power supply for factories, construction projects, commercial buildings, hospitals, and backup power applications.

With advanced Japanese technology, AIRMAN generators offer low noise operation, low fuel consumption, and reliable performance even in heavy-duty conditions. Their strong engine quality and easy maintenance system make them highly suitable for the climate and industrial needs of Bangladesh.

Advantages of AIRMAN Generators:

- Fuel-efficient and cost-effective operation
- Durable Japanese engineering and long service life
- Low noise and environmentally friendly design
- Stable power output for industrial and commercial use
- Easy maintenance and reliable performance
- Suitable for continuous and emergency power supply

AIRMAN generators are a dependable solution for businesses and industries seeking quality, efficiency, and uninterrupted power in Bangladesh.

Technical Specifications:

Power Output	13 KVA – 610 KVA
Engine Brand	AIRMAN
Alternator Brand	Taiyo (Japan)
Fuel Type	Diesel
Frequency	50 Hz
Frequency	50 Hz
Voltage	400/230V
Cooling System	Water Cooled & Air Cooled
Starting System	Electric Start
Governor Type	Mechanical / Electronic
Noise Type	Silent Canopy
Application	Industrial & Commercial Backup
